Agility Assessments

description_

Are you eager to uncover the reality of your organization's level of agility? Is there a proper alignment on goals and outcomes across all levels of the organization? Before embarking on an agile transformation, it's important to have a clear understanding of your current way of working, level of agility, and alignment between teams and departments. This allows you to build on what's already in place, identify areas for improvement, and create a tailored approach to meet the unique needs of your organization. But how do you assess your current state of agility?

We offer a range of services designed to help organizations assess their business agility. Our Agility Snapshot assessment evaluates teams separately, from both team and business agility perspective, providing a detailed understanding of the strengths and weaknesses of each team.

Our Enterprise Agility Assessment, on the other hand, provides a holistic view of the organization from a business agility perspective, enabling organizations to see where they stand in terms of agility and what changes need to be made at an enterprise level.

Service Metrics

Effort   : 5-7 Person/Day
Duration   : 1-2 Weeks
Team structure : 1 Agile Transformation Consultant | 2 Agile Coaches

Tooling

| Mentimeter | Miro | Powerpoint |

motivations_

- Identifying pain points and bottlenecks to prioritize initiatives that improve overall agility and competitiveness
- Improving alignment and collaboration for identifying and addressing any misalignments or barriers to effective collaboration, leading to a more productive and efficient workforce
- Understanding market and customer needs for more effective and customer-focused products and services
- Assessing the current agility level and identifying areas for improvement to stay ahead of the competition and thrive in the market

recommended adesso services_

- Agile Transformation
- OKR Coaching
- Agile Trainings

deliverables_

With each assessment, we provide a comprehensive report to the customer that highlights the most pressing pain points, bottlenecks, and organizational challenges. This report serves as a reference and guide for the development of a tailored transformation approach, crafted in collaboration with management and key stakeholders within the organization.

- Agility Snapshot Report
- Enterprise Agility Report
- Scrum Team Health Report
- Kanban Team Maturity Report

references_

- MSD
- Mercedes-Benz
