

# adesso enterprise agile & lean transformation consultancy

Achieve organizational excellence and business agility through tailored solutions

## MAIN STEPS

1. Conducting comprehensive initial assessment to understand current pain points, organizational impediments, interactions, individual and team motivation
2. Understanding organisational structures, value flow, product definition and decision-making process
3. Crafting the Transformation Vision, Objective and Key Results (OKRs) to design and shape the desired future state of your organization
4. Training the people about agile frameworks, roles and leadership styles
5. Running pilot projects with agile product teams using an empiric approach to establish a solid ground for best practices
6. Training and developing leaders at all levels to initiate cultural transformation
7. Rolling-out agile transformation initiative across the company once the pilot project is bought in and successful

## Prepare to launch! 3...2...1... Lift off!

adesso agile Lab delivers tailored solutions for sustainable transformation. Proven methods and frameworks that are achieved through our end-to-end evaluations bring real business agility to your entire organization. In this journey, our main goal is to help you achieve strong leadership, cultural transformation and human-oriented evolutionary change by coaching leaders at all levels.

## Tailored & fit-for-purpose solutions

Every path towards agility is unique in its route and needs. Regardless of your level of agile maturity, adesso agile Lab provides customized and scalable solutions addressing your evolving needs leveraging its broad industry experience. To fit any unique circumstance, we focus primarily on understanding, identifying and framing your agility health instead of applying one-size-fits-all solutions. adesso Agile Transformation Framework offers a deep insight and methodology to guide you on your transformation journey while measuring your success along the way.

## What you should expect

Agile Transformation will help individuals and the organization itself become more:

### Adaptive

Ability to adapt to fast-changing environments

### Creative

Ability to develop more creative and innovative products

### Resilient

Become more resilient and flexible during volatility and uncertainty

## Our competence

Different organizations have varying levels of complexity, requirements and objectives, their agility journey also differs accordingly. Let's plan your agile transformation together. Pick a plan where our expert team will guide you through the finest detail.

## Enterprise agile transformation framework

Agile transformation is a continuous journey, not a final destination. You're going to need the necessary expertise and support to measure the progress, demonstrate results, and justify your investment. You'll start the agile adoption with a pilot team, and pivot as you progress. You'll need strong leadership and coaching to keep everyone on board and engaged throughout the process.
